Cottage Tulips

Darwin, Cottage and Breeder Tulips

WE OFFER the following varieties of Breeder, Cottage and Darwin Tulip bulbs (B) (C) (D), and recommend them for planting in beds as well as in groups in the herbaceous border and among shrubs. They usually begin to flower during the middle part of May, the blooms remaining in condition a very long time. To succeed with bulbs it is necessary to begin right, by getting sound bulbs of good size, and we warn intending purchasers against buying cheap, undersized bulbs and expect the fine results obtained from such as we offer. The flowers from our quality bulbs, the best that Holland produces and imported directly by us, are extremely large and borne on tall, strong stems.

The bulbs should be planted not less than five inches apart, and from five to six inches deep (to the bottom of the bulb) in well drained soil before the ground freezes. After the ground is frozen hard, a covering of leaves or straw will prevent the injury of the roots from frequent freezing and thawing. This should be removed in the spring as soon as heavy frost is past.

We suggest ordering early while our stock is complete, and then to plant the bulbs as soon as received. Twenty-five bulbs of any one variety furnished at the hundred rate.

	Doz.	100

UPTACK HILL GREENHOUSE

FRED R. and RALPH O. SPOFFORD

Uptack Road

South Groveland, Mass.

To Our Friends and Customers

For several years The Whitcomb Greenhouse, 40 Westland Terrace, Haverhill, Mass., owned by Myron L. Whitcomb, has been managed by Ralph O. Spofford who has now leased the greenhouse and taken over the business.

The business will be conducted as in the past, growing flowers at The Whitcomb Greenhouse, and annuals and plants for the Memorial Day trade at the Uptack Hill Greenhouse.

Your patronage for Choice Plants, Flowering Bulbs, Funeral Designs, Old-fashioned Colonial Bouquets and flowers for every occasion will be greatly appreciated.
